

Population Battle of Brazil

12th November 2023

The United Nations is **highly skilled** in **second guessing censuses** when their **crystal balls** provide them with sufficient clairvoyant clarity to precisely quantify a perceived **under numeration**.

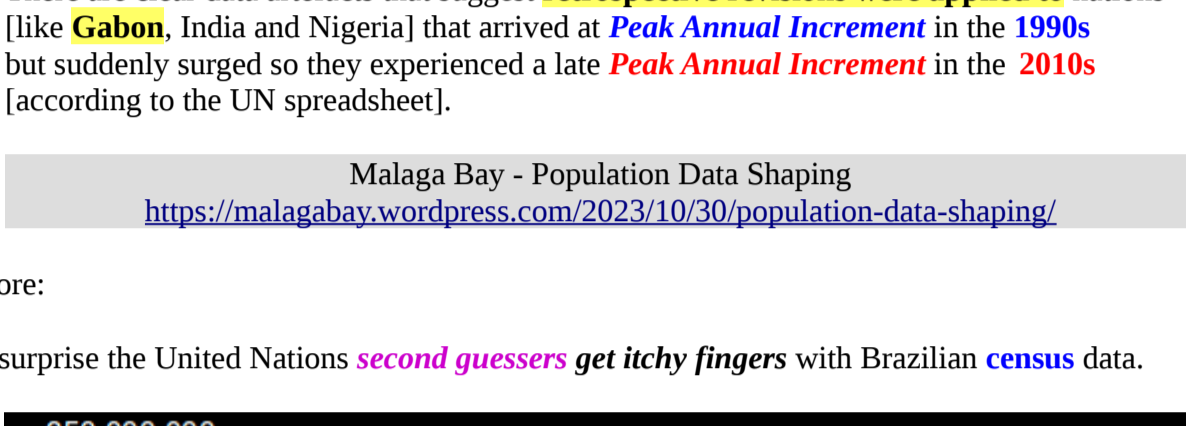

Vital statistics
Registration of vital events is in **Gabon** not complete. The Population Department of the **United Nations** prepared the following estimates. Population **estimates account for under numeration in population censuses**.

Second-Guess ... When you question or just doubt a decision that's already been made, you've second-guessed it. The term implies a lack of confidence in the first choice or at least a feeling of uncertainty about it.

The United Nations is also **highly skilled** in **second guessing itself** when their modern **crystal balls** [with high precision hindsight] detect **under** or **over numeration** in their previously published data.

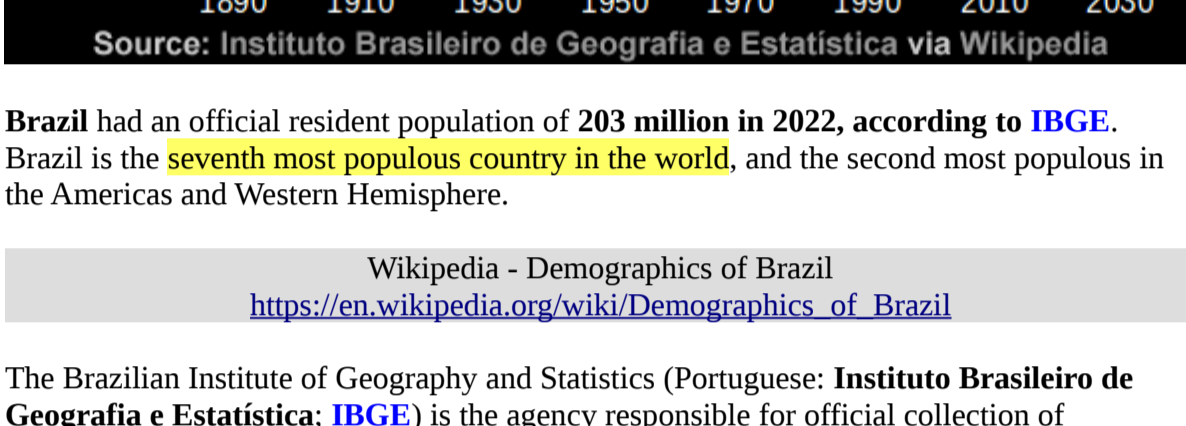

There are clear data artefacts that suggest **retrospective revisions were applied to** nations [like **Gabon**, **India** and **Nigeria**] that arrived at a **Peak Annual Increment** in the **1990s** but suddenly surged so they experienced a late **Peak Annual Increment** in the **2010s** [according to the UN spreadsheet].

Therefore:

It's **no** surprise the United Nations **second guessers** **get itchy fingers** with Brazilian **census** data.

Brazil had an official resident population of **203 million in 2022**, according to **IBGE**. Brazil is the **seventh most populous country in the world**, and the second most populous in the Americas and Western Hemisphere.

The Brazilian Institute of Geography and Statistics (Portuguese: **Instituto Brasileiro de Geografia e Estatística**; **IBGE**) is the agency responsible for official collection of statistical, geographic, cartographic, geodetic and environmental information in Brazil. ... The best known census in the modern form is the **population census** (Brazilian Portuguese: censo demográfico). **First conducted** in its modern form in **1872**, it is now conducted every ten years, usually in years ending in zero. No census took place in 1880, 1910 or 1930. ... The most recent census was conducted in 2010; the 2020 census was delayed to 2022 due to the COVID-19 pandemic.

get itchy fingers
To be or become **eager to begin**, undertake, or become involved in some work or task, especially one that involves one's hands.

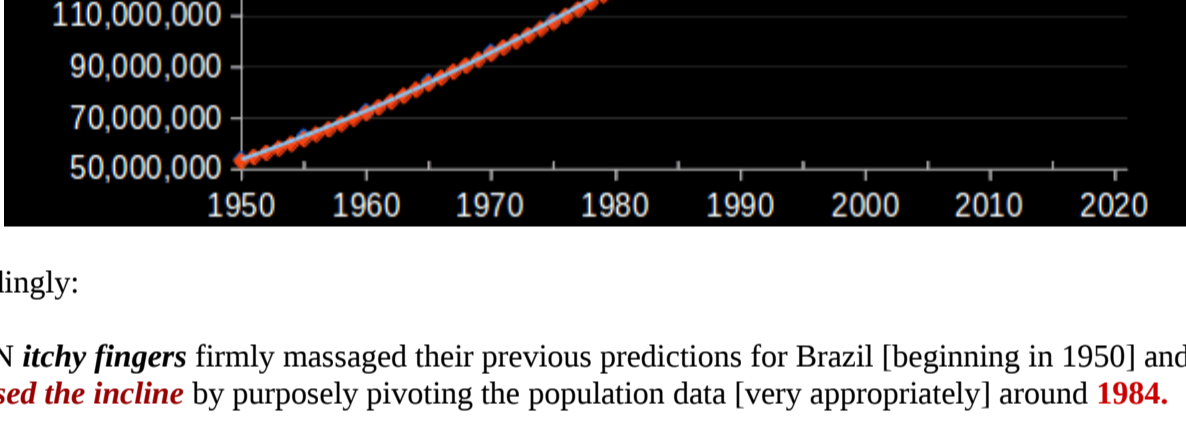

The Free Dictionary - Itchy Fingers
<https://idioms.thefreedictionary.com/itchy+fingers>

The UN **itchy fingers** produced a preposterously perfect polynomial for Brazil during 2022 that is predicated upon a Brazilian population of **zero** in the early 1930s.

United Nations - World Population Prospects 2022 - Online Edition
Department of Economic and Social Affairs - Population Division
[https://population.un.org/wpp/Download/Files/1_Indicators_%20\(Standard\)/EXCEL_FILES/1_General/WPP2022_GEN_F01_DEMOGRAPHIC_INDICATORS_COMPACT_REV1.xlsx](https://population.un.org/wpp/Download/Files/1_Indicators_%20(Standard)/EXCEL_FILES/1_General/WPP2022_GEN_F01_DEMOGRAPHIC_INDICATORS_COMPACT_REV1.xlsx)

The UN **itchy fingers** scratched their previous population prognostications for Brazil because they now consider their 1996 data contains a confounding combination of **under** and **over numerations**.

Accordingly:

The UN **itchy fingers** firmly massaged their previous predictions for Brazil [beginning in 1950] and **increased the incline** by purposely pivoting the population data [very appropriately] around **1984**.

The resultant preposterously perfect polynomial produced by the UN **itchy fingers** suggests the 2022 Brazilian **census under numeration** amounts to [in round numbers] **13 million people**.

Stated differently:

The United Nations **second guessers** suggest the 2022 Brazilian **census overlooked** the equivalent of **two cities** about the size of **Rio** in a country where it's compulsory to carry formal identification.

In summary:

The **battle lines** are drawn between two very different Brazilian population projections that are problematic because both are represented by preposterously perfect polynomials.

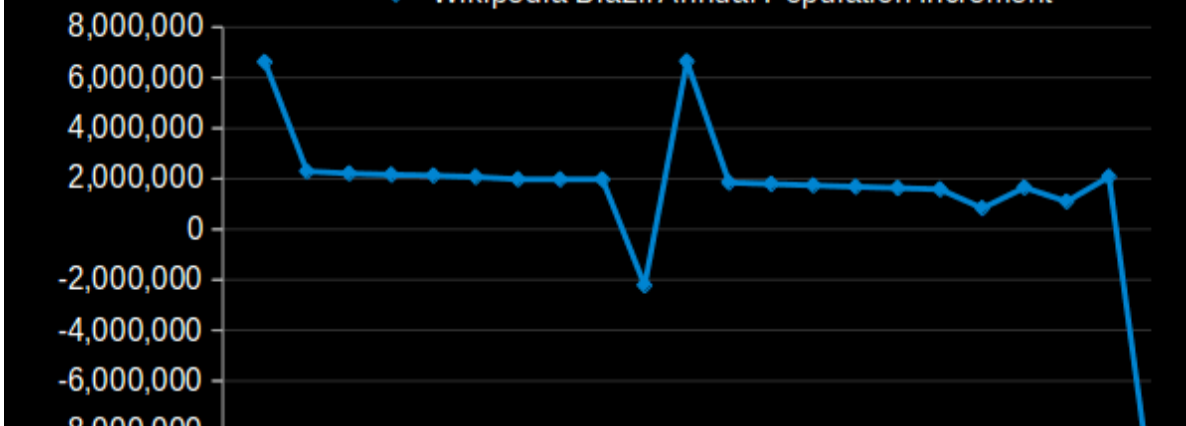

The Wikipedia **battle field** currently combines the two data sources in a **Births & Deaths** table with a crazy count of the population that contains a comical oscillation cancelling the 2010 census count.

It seems unlikely reality has any role to play in the preposterously perfect **Battle of Brazil**.

There are countries where the **Death Count** curiously **flatlines** as the population grows.

In 1969 the United Nations began establishing their *leadership role* in population censuses.

The **United Nations Population Fund (UNFPA)**, formerly the United Nations Fund for Population Activities, is a UN agency aimed at improving reproductive and maternal health worldwide.

The UNFPA supports programs in more than 144 countries across four geographic regions: Arab States and Europe, Asia and the Pacific, Latin America and the Caribbean, and sub-Saharan Africa.

The agency began operations in 1969 as the United Nations Fund for Population Activities under the administration of the United Nations Development Fund.

Symposium on Global Review of 2000 Round of Population and Housing Censuses: Mid-Decade Assessment and Future Prospects

The United Nations has, over the years, issued a series of handbooks and technical reports intended to assist countries in carrying out population and housing censuses.

Handbook on the Management of Population and Housing Censuses - Revision 2 - 2021

Unfortunately:

Recent events indicate their *leadership role* is similar to *the fox guarding the hen house*.

A census is the procedure of systematically acquiring, recording and calculating population information about the members of a given population.

The United Nations (UN) defines the essential features of population and housing censuses as "individual enumeration, universality within a defined territory, simultaneity and defined periodicity".

UN recommendations also cover census topics to be collected, official definitions, classifications and other useful information to co-ordinate international practices.

This seems to be an international problem that a lot of people in Care Homes died who should not have died.

Sometimes they weren't given treatments they should have been given.

Other times they were given treatments that they should not have been given.

More people died and this was part of the reason I believe that Covid looked a lot more deadly than it actually turned out to be.

- The UN claimed climate change threats to people in the 21st century and

0:00 no good deed goes unpunished but lying for the establishment is a path to
0:04 success to promotion and wealth repeating the establishment's lies
0:09 cheerleading for them pushing and supporting whatever lies The
0:12 Establishment tells carries no damaging consequences for the Liars even when the
0:17 lies are exposed and lies are always exposed in the end the Liars shrug and
0:21 move on to telling more lies telling the truth however in this upside down world
0:26 will never be forgiven still out there in perdition exiled never to return to their
0:30 old lives to the restoration of the reputations they had before are those
0:34 who told the truth exile for defying The Establishment is a life sentence but
0:40 while lying carries no consequences for the Liars there are sentences all
0:45 sorts that the Liars never see coming just as for instance the number of
0:49 American parents deciding not to submit their children to the state recommended
0:53 jobs is at an all-time high never has such a large proportion as much as 5% in
0:58 some states opted to keep their child away from the needle who could blame
1:03 them I'm not aware of a similar report here in the UK but it's reasonable to
1:06 imagine a parallel Trend hesitancy born of suspicion that those in charge of the
1:11 medical world those making the decisions are not to be trusted and once trust
1:15 goes it never comes back the world of medicine has made itself untrustworthy
1:20 the lying is everywhere now more and more people see the lies coming at them
1:24 from all over every day the lying about the pandemic the use of dishonest
1:29 propaganda the deceit and obfuscation the nudging and scops the threats and
1:33 bullying the censorship and silencing of dissenting voices are more blatantly
1:37 exposed also exposed is the truth of what some voices warned early in the
1:41 debacle about the economic suicide of
1:44 lockdown about lockdowns inevitable
1:46 harms to health physical and mental
1:48 about unforgivable harms to children
1:50 every day the lie about safe and
1:52 effective the 100% safety and efficacy
1:55 we were told to trust in relation to
1:56 those Medical Products promoted as
1:58 vaccines is more obvious
2:00 and yet **last week in Brazil the**
2:01 **population was told that if they don't**
2:03 **get their children jabbed with those**
2:04 **products they'll be denied state**
2:07 **welfare** big Pharma was not even asked to
2:10 test whether its products would prevent
2:11 transmission of disease the claim that
2:13 was the entire foundation and
2:15 justification for pushing those products
2:17 mandating them for health workers on
2:19 pain of losing their jobs pushing them
2:20 on children for whom the risk from covid
2:23 was so low it emerged at one point that
2:25 4 million doses would have to be given
2:27 to 2 million children to a single
2:30 admission to intensive care that the
2:33 products would not stop transmission
2:34 that the benefits of wholesale jabbing
2:36 of children were vanishingly small if
2:38 not non-existent that the gcvi The Joint
2:41 Committee on vaccination and
2:42 immunization had discussed and
2:44 acknowledged that the risk from the
2:46 injectables of myocarditis and
2:48 pericarditis especially in young males
2:50 was real and serious was we know now
2:53 information available to those dictating
2:56 policy from before the beginning and yet
2:58 still the people of this country and the
3:00 wider world were bombarded that those
3:02 Clock with propaganda that Round the
3:04 products were safe and effective indeed
3:06 that to refuse them was tant out to
3:08 deliberately killing granny lies I say
3:12 all of this makes what happened what was
3:14 knowingly inflicted on the people of
3:15 this country from youngest to oldest
3:18 unforgivable when I was a child fairy
3:20 stories started with Once Upon a Time
3:23 now they begin according to experts I
3:25 hold my hand up and say I was in the
3:28 beginning as gulled as the next dup but
3:31 in spite of that for those first weeks
3:32 it never occurred to me that the
3:34 government and others in Authority would
3:36 knowingly unleash harm on us and yet it
3:38 becomes unavoidably clear that they did
3:41 that's precisely what they did There's
3:43 now no denying the truth that they were
3:45 informed of the harms that would be done
3:47 but that they went ahead anyway right
3:50 there is the reason why there have been
3:51 and will be Co inquiry or no Co inquiry
3:55 no meaningful consequences for those
3:57 responsible because the appropriate
3:59 consequences would surely see the
4:01 highest in the land behind bars for
4:03 years if not for the rest of their lives
4:06 and let's face it that ain't ever going
4:07 to happen in this upside down world you
4:10 and I might face jail time for lighting
4:12 a wood burning stove in Winter or saying
4:14 a man can only be a man and a woman can
4:16 only be a woman but for setting in train
4:18 events that killed permanently injured
4:20 or otherwise destroyed never to be known
4:22 numbers of people all that lies ahead
4:25 are honors bigger jobs and bigger
4:26 bonuses no meaningful consequences for
4:29 the Liars then and the same voices that
4:31 lied about all of it have gone on to lie
4:34 I say about one thing after another
4:36 about the human impact on climate about
4:38 the building of a digital prison with
4:40 digital IDs social credit scores and
4:42 Central Bank digital currencies about
4:44 the war in Ukraine and most recently
4:46 about the blood drenched hellscape of
4:49 Gaza the peoples of the world are set at
4:52 each other's throats and as abuse is
4:54 howled between entrenched groups and
4:55 sides all manner of world changing
4:57 Mischief is plotted and acted upon On by
4:59 The Usual Suspects that never face the
5:01 consequences of their actions while the
5:04 fires burn and the blood flows Bill
5:06 Gates's World Health Organization moves
5:08 to centralize power over 193 member
5:11 States including the UK the same Liars
5:13 are lying about that of course saying
5:15 the amendments to the international
5:17 Health recommendations are nothing at
5:18 all to fear that no threat at all is
5:21 posed to National sovereignty but Liars
5:23 lie that's what they do I say now though
5:26 the Liars are playing with fire they
5:28 lied about the war in Ukraine and now
5:30 half a million ukrainians are dead
5:32 alongside tens of thousands of Russians
5:35 in April 2022 former UK prime minister
5:38 Boris Johnson scuppered any hopes of
5:40 early peace the big lie about the West's
5:42 involvement in Ukraine was that it was
5:44 about saving democracy there but since
5:46 that lofty claim was made president
5:48 zalinski has banned opposition taken
5:50 control of the media stopped elections
5:52 and most recently banned the
5:54 thousand-year-old Ukrainian Orthodox
5:56 Church from the very beginning there
5:57 were voices asking questions about that
5:59 place and that war about the involvement
6:02 of the Biden family with business deals
6:04 there about the way the United States
6:06 pushed audet in Ukraine in 2014 to get
6:09 rid of a pro-russian president and
6:11 replace him with one well disposed to
6:12 Washington about Nazis in the ranks of
6:15 Ukraine's fighting forces any and all
6:17 questions about those matters and more
6:19 besides were loudly shouted down as some
6:21 sort of treason there's no doubting the

2020 Vaccination Campaign - Passira, Pernambuco
Ministério Público de Pernambuco

As of November 2021, Brazil has the lowest level of vaccine hesitancy in Latin America. Experts ascribe this to long-standing vaccination programs run by the public health system and to the inclusion of a vaccination requirement in social welfare programs. At the same time, vaccination coverage has been decreasing since 2011, mainly among rural families and people with low education.

Routine vaccinations ... For children

01. BCG vaccine, Intradermal, at birth
02. Hepatitis B vaccine, at birth, 1 and 6 months
03. Pentavalent vaccine, DTP (whole cell pertussis component), HB, and Hib, administered at 2, 4, and 6 months, with a booster (DTP) at 15 months and 4 years.
04. Polio vaccine (inactivated), at 2 and 4 months
05. Polio vaccine (oral), at 6 and 15 months
06. Rotavirus vaccine (monovalent oral human rotavirus vaccine) at 2 and 4 months
07. Pneumococcal vaccine (10-valent conjugate vaccine d at 2, 4, 6, and 10 months
08. Yellow fever vaccine at 9 months and booster every 10 years
09. MMR vaccine at 12 months and 4 years
10. Meningococcal vaccine at 3, 5, and 15 months
11. Influenza vaccine, annually

Autism is part of a group of disorders known as autism spectrum disorders (ASD), characterized by varying degrees of symptom severity and impact, mild to quite severe. The hallmark characteristics of autism include an impaired ability to communicate and relate to others socially. Autism is also associated with a restricted range of activities and repetitive behaviors, such as obsessively arranging objects or following very specific routines. ASD can usually be reliably diagnosed behaviorally by 24 months of age although new and promising research aims to establish screening and diagnostic measures for children as young as 12-18 months. ... Despite some preliminary efforts there is not a reliable population-based prevalence estimate published in Brazil, nor in any other Latin America country. ... Based on these international estimates, it is conceivable that as many as 1.5 million Brazilians are currently living with ASD.
